

# Workforce+Education=Future

Please indicate your interest in participating in any three of the discussions on the following topics at the summit  
(1=highest, 3=lowest)

- K-12 Education:** Identifying K-12 challenges and developing a strategy to resolve them. Proposed topics include effective teaching, classroom technology, and student mentoring.
- Knowledge & Skills Analysis:** Identifying the knowledge and skills that the workforce of both today and tomorrow need, and linking all strategies to those skills.
- Career Development:** Providing early career development to students and preparing them for the workforce.
- Science, Technology, Engineering & Math (STEM) Development:** Discovering ways to advance learning in STEM areas in order to grow an innovative and competitive workforce.
- Existing workforce training:** Creating and expanding training opportunities to prepare the workforce and fill workforce gaps.
- Community/Business Engagement:** Determining how to engage businesses and the community in education and workforce development.
- Under-utilized workforce:** Using and building on the expertise of the under-utilized workforce, e.g. retirees, non-commissioned military officers, and the disabled.
- Attracting and Retaining the Workforce:** Discovering ways to attract and retain quality workforce.
- Communications strategy:** Forming and conveying the message that workforce development and education are key issues that affect us all.
- Public Policy:** Identifying barriers to reach goals and establish approaches to remove those barriers.

Please include your contact information so that we can get in touch with and start working with you.
